

LazyX Whitepaper

1. Executive Summary

LazyX is a sloth-themed meme token on the XRP Ledger that rewards NFT holders with automated daily token drops via our Lazy Airdrop Bot. Our mission is to bring fun, community-driven DeFi to the XRPL, combining NFT utility with tokenomics that support long-term growth.

2. Market Opportunity

The XRP Ledger offers low fees and high throughput, making it ideal for NFT and DeFi integration. However, existing solutions often require manual distribution, incur gas costs, and fragment liquidity. LazyX addresses these challenges with a fully automated, gas-free rewards mechanism and integrated DEX features.

3. The LazyX Solution

- NFT Airdrop Bot: Daily, gas-free token drops to all verified NFT holders.
- Vault Lock & Earn: Stake tokens for 30/60/90 days with dynamic APYs.
- DEX Integration: Fast swaps, intuitive liquidity panels, and a buy-back fund.
- Community-First: Service is always free for NFT holders; 50 XRP service fee split 50/50 between team development and buy-backs.

4. Technical Architecture

- XRPL Token Contract: Issuer address `rwWxo9iM7KGyGL9S5XPSroDihGg1ZuBbJJ`; holders set trustlines to LAZYX.
- Bot Workflow: Project registration → token deposit → duration selection → trustline verification → scheduled airdrops → real-time reporting.
- Website & Dashboard: Built on Wix with Velo, providing live stats for holders, volume, TVL, and vault-locked supply.

5. Tokenomics

Total Supply: 100,000,000 LAZYX

Dev & Vault Lock: 10% time-locked to ensure commitment.

Service Fee: 50 XRP per project → 25 XRP to Team Fund, 25 XRP to Buy-Back & Bonus Rewards.
